New Winner's Circle program year starts October 1

Youth livestock exhibitors – join us in the Winner's Circle this year. Save \$1 per bag of livestock feed throughout the year and earn money for your 4-H club or FFA chapter. This year, members will receive a Winner's Circle t-shirt for joining. See your local store or contact your territory sales manager for an application. Only 2021-2022 applications will be accepted.

Agromony Tip Sheet

As we head into fall, it is a good time to think about fertilizer for your hayfields and crop land.

Applying phosphorous and potash in the fall has several benefits. On hayfields, phosphorous and potash aid in root development to help your grasses survive the winter and thrive as temperatures warm in the spring. Another benefit of a fall application is that it gives the products time to break down in the soil so that more of the nutrients are plant-available in the spring. This applies to hay, pasture and row crops. Applying fertilizer in the fall can also help to reduce the workload in the spring when time and weather can limit what gets done. Speak to a CFC representative for tips on planning for your farm.

Find this and previous tip sheets at www.cfcfarmhome.com/agromony/agromony-tip-sheet.

VitaFerm Concept•Aid minerals

A free-choice vitamin and mineral supplement for beef cattle specifically designed for reproductive success when fed 60 days pre-calving through 60 days post-breeding. Especially beneficial in A.I. and E.T. breeding programs. Use Concept•Aid to increase your herd's reproductive performance. Concept•Aid has 2.5X NRC for quicker impact, high levels of Vitamin E for reproductive tract repair, and contains organic trace minerals for more stability and higher bioavailability as well as Amaferm, a precision-based prebiotic that impacts intake, feed digestibility and nutrient absorption for optimum health and performance.

Discount valid for VitaFerm Concept•Aid 5/S, 5/S with Clarify and Mag/S 50 lb bags.

\$0.50 OFF

per 50 lb bag, maximum 80 bags

Valid October 1-31, 2021. Limit one coupon per customer. Cannot be combined with other offers. Does not include delivery.

Ready-to-Use and Concentrates

How to Control Fall Weeds

1. Spot treat landscape weeds. Every weed has a lifecycle and the weeds you spot treated in summer are not the same ones you'll need to spot treat in fall. Use Roundup® Ready-to-Use Weed & Grass Killer III with Sure Shot Wand to kill weeds to the root.
2. Kill lawn weeds. It's a new season and different weeds are attempting to take over. Use Roundup® For Lawns to treat weeds as soon as they emerge.
3. Continue healthy lawn practices. The best defense against grassy weeds and broadleaf is a thick, healthy lawn. Keep feeding, watering and mowing to help your lawn stay strong.

Check out these and other formulas at your local CFC Farm and Home retail store!

Roundup® For Lawns is a formula that kills weeds, not the lawn. It controls over 250 common lawn weeds, roots and all, and is especially effective on hard-to-kill weeds such as crabgrass, dandelion, clover and yellow nutsedge. The ready-to-use formula with the new extended

wand makes it easier than ever to spot-treat lawn weeds, without bending over. This fast-acting formula starts killing on contact and kills weeds down to the root so they don't come back. In addition, it's rainproof in as little as 3 hours. Roundup® For Lawns is a simple step toward a beautiful, weed-free lawn.

The economical, effective way to handle larger areas, Roundup® Concentrates are simple to prepare and use, and they deliver all the weed control power you expect from the Roundup® brand. Roundup® Weed & Grass Killer Concentrate Plus is perfect for use around flowers, shrubs and trees, on patios, walkways, driveways, gravel areas and mulch beds, and along fences, edging and foundations (not for use around existing edibles). It is also effective on large areas such as lawn replacements or garden plot preparation.

Farm and home essentials. Hometown pricing. Outstanding service.
